Professional Summary

Detail-oriented IT professional with hands-on experience in cloud infrastructure, networking, and systems administration. Strong communicator with a customer-first approach and a proven track record of reliability and leadership in fast-paced environments. Seeking an IT Support or Help Desk internship or entry-level role to apply foundational technical skills and deliver exceptional end-user support.

Skills

Core Competencies: Technical Troubleshooting, Customer Service, Systems Analysis, Team Leadership

Operating Systems: Linux (Ubuntu), Windows Server, Windows 10/11

Networking and Security: TCP/IP, VLANs, Network Topology, Security Controls

Cloud Computing: AWS Elastic Beanstalk, Amazon RDS, EC2, Auto Scaling, Load Balancing

Education

California State University, Northridge
Bachelor of Science in Computer Information Technology. Minor in Management. *May 2028*
Relevant Coursework: Networking, Cybersecurity, System Analysis, Database Management, Cloud Computing

North Hollywood High School
High Honors.

Certifications

- Google IT Support Professional Certificate (In Progress)
- CompTIA Security+ Certificate (In Progress)

Projects

High-Availability WordPress Website with Amazon RDS
- Deployed a WordPress application to AWS Elastic Beanstalk using an external Amazon RDS database.
- Separated application and database layers to improve reliability, scalability, and persistence.
- Configured cloud application deployment, environment settings, and database connectivity.

AWS Auto Scaling and Load Balancing Project
- Built a fault-tolerant AWS environment using load balancing and automatic instance replacement.
- Configured health checks to enable automatic replacement of failed instances and maintain application availability.
- Applied high availability, redundancy, scaling, and failure recovery principles in an AWS cloud environment.

Ubuntu Apache Web Server Lab
- Installed and configured an Apache web server on an Ubuntu virtual machine.
- Verified web server access through a browser and confirmed IP address settings using Linux commands.
- Troubleshot local network connectivity and virtual machine access issues.

Secure Network Design Proposal
- Designed a secure business network incorporating VLANs, wired and wireless access, printers, IP phones, and internet connectivity.
- Planned network topology, device placement, scalability, traffic flow, and basic security controls.
- Created a network diagram illustrating routers, switches, access points, servers, and department connections.

Experience

Certified Trainer September 2022 – Present
Chipotle Mexican Grill *North Hollywood, CA*
- Delivered clear, step-by-step training to new team members on operational procedures and customer service standards.
- Resolved day-to-day operational issues quickly in a high-volume environment, demonstrating accountability and reliability.
- Communicated consistently between team members and management to ensure smooth, dependable daily operations.
